

Amendments to the Specification:

At page 1, after line 29, please include the following Summary paragraphs:

SUMMARY OF THE INVENTION

In one aspect, the invention features an accounting system. The accounting system comprises a receiver for collecting first meter information from a first unique combination of a game and a denomination in a single game unit, and for collecting second meter information from a second unique combination of a game and a denomination in the single game unit. The accounting system further comprises a database for storing the collected information.

In another aspect, the invention features a method of accounting for networked gaming devices. The method comprises accepting values from more than one unique combination of a game and a game denomination from a single game unit and storing the accepted values. The method further comprises accepting queries to the accepted values to extract a subset of the stored values.
